

# » KBH MULTI PURPOSE ENCLOSURE

## KBH MULTI PURPOSE ENCLOSURE (SAFETY, DUST, NOISE)

- **Close-cut enclosure with plastic web panels**
- **Alternative: Increased efficiency through the use of noise reduction panels**
- **Reduction of energy costs, noise and dust**
- **Enclosure of existing paver production lines as retrofit**
- **Design based in local circumstances**
- **Exhaust ventilation in board machine for the reduction of fine dust pollution**
- **Visual accessibility to critical machine components via camera system**
- **Reduction of additional safety fencing**

## ADVANTAGES

- Reduction of approx. 80 % exhausting power
- ROI in up to 5 – 8 years due to electricity savings
- Installation of noise reduction panels allows omitting costly machine enclosure with insulated panels
- Installation of camera system allows for proper monitoring of machine functions

## EQUIPMENT / PERFORMANCE

- Engineering
- Camera system
- Multi Purpose Enclosure
- Exhaust ventilation system
- Design / Installation
